Type 2 is the most common form of diabetes accounting for 85–90% of all cases. It has previously been referred to as non-insulin-dependent diabetes mellitus. However, since many patients with type 2 diabetes require insulin, this terminology causes confusion and should no longer be used. The condition is usually diagnosed in people aged over

More than 25% of the U.S. population aged ≥ 65 years has diabetes (1), and the aging of the overall population is a significant driver of the diabetes epidemic. Although the burden of diabetes is often described in terms of its impact on working-age adults, diabetes in older adults is linked to higher mortality, reduced functional status, and increased risk of institutionalization (2).

control in patients with type 2 diabetes, Pittas et al. 50 concluded that insufficient vitamin D and calcium appears to hinder glycemic control and that supplementing both nutrients may be necessary to optimize glucose metabolism.

Vitamin D and Diabetes | Diabetes Spectrum

SUBJECTS WITH TYPE 2 diabetes have either normal or slightly elevated fasting glucagon concentrations that fail to decrease appropriately after food ingestion (1- 9). We previously demonstrated that a lack of suppression of glucagon causes marked hyperglycemia when insulin secretion is impaired, but minimally alters glucose tolerance when insulin secretion is intact (10- 12).

Lack of Suppression of Glucagon Contributes to ...

Diabetes and obesity are closely linked. Charity Diabetes UK states that obesity accounts for between 80 and 85% of the risk

Diabetes prevalence has been rising more rapidly in low- and middle-income countries than in high-income countries. Diabetes is a major cause of blindness, kidney failure, heart attacks, stroke and lower limb amputation. In 2016, an estimated 1.6 million deaths were directly caused by diabetes.

Diabetes - World Health Organization

IN BRIEF Obstructive sleep apnea (OSA) alters glucose metabolism, promotes insulin resistance, and is associated with development of type 2 diabetes. Obesity is a key moderator of the effect of OSA on type 2 diabetes. However, chronic exposure to intermittent hypoxia and other pathophysiological effects of OSA affect glucose metabolism directly, and treatment of OSA can improve glucose ...

Sleep Apnea in Type 2 Diabetes | Diabetes Spectrum

Diabetes is a chronic incurable disease, for which modern treatments remain somewhat unsatisfactory. It is therefore perhaps not surprising that some patients seek alternative treatments with more attractive claims. Diabetes health professionals need to be aware of the potential dangers associated with some of these treatments.
