Now you can make this easier and filter out the irrelevant results. Restrict your search results using the search tools to find only free Google eBooks.

Photography Art Or Science

The Science of Photography. The science part of photography includes all the technical equipment and the techniques required to produce an image. Unlike painting a landscape in oil, taking an image can be highly technical and there is one huge interference, and that is that the camera is between the subject matter and the photographer. An artist does not have this alien device separating the two elements, all he has is the canvas, his subject and a brush. The Art of Photography

Is Photography an Art or Science? - Art Photogrenier

Without further research, I tentatively concluded that photography is Art. But being the tenacious fact-finding journalist I allege to be, I went to all the trouble of Googling Science, too.

Is Photography Art or Science? | Shutterbug

When it comes right down to it, photography is a personal pursuit. Whatever reason you enjoy your own or others images, whether it's the technical skill involved or the emotion embedded within the photo, I think we can all agree that Photography is an Art and Photography is a Science.

Photography: Art or Science? - Project RAWcast

While Edgar Allan Poe dubbed the invention of photography to be 'the most extraordinary triumph of modern science', Charles Pierre Baudelaire pronounced photography to be the biggest mortal enemy of art. And yet, centuries later the classification of photography under an either/or section of art and science hasn't been reached.

Science Behind Photography | Art Of Photography ...

In fact, when people ask the question about the true nature of photography, they often mean to ask whether it is art or it is science. Many people consider photography as an art because it allows for an expression of emotion. They believe that digital photography is a continuation of the art of drawing or painting.

Is The Nature Of Photography An Art Or Science?

Photography. The word "photography"which is derived from the Greek words for "light"and "writing", was first used by Sir John Herschel in 1839, the year the invention of the photographic process was made public. L.J.M Daguerre, "The Louvre from the Left Bank of the Seine" daguerreotype,1839. Scientific Discoveries.

Photography - Art or Science - iosart.com
