The truth is children's books are no easier to write than books for adults. Books for older children demand all the elements that books for adults do: strong characterizations, fresh exciting plots, lots of action and clear, precise language, as well as the ability to see the world through a child's eyes, mind and heart.

Most writers are writing picture books for ages 3 - 7 — that's the most common category. If that's you, then shoot for 750 words. That's the sweet spot. If you write a picture book more than 1,000 words, you're sunk. You absolutely have to keep it under 1,000 words. It's the most unyielding rule in the entire industry.

I adore this series so much, the brilliant writing of Ellery Adams is perfectly narrated by Karen White. Each and every character in this series is so well developed & has a solid story line all their own. By the time you get to this book (if you start the series at book 1, which I recommend), you feel like you are a part of the Bayside book club.

Reduce basals to reference books -- slim core texts that set forth as clearly as a dictionary the essential skills and information to be learned at each grade level in each subject. In content areas like history and science, the core texts would be like mini-encyclopedias, fact-checked by experts in the field and then reviewed by master teachers for scope and sequence.

I'd rate this 4.5 stars. If Back to the Future and Dark Matter had a baby, the end result would be Elan Mastai's slightly crazy, tremendously compelling All Our Wrong Todays. While it's not as zany as the former, or as heart-pounding as the latter, it's a really creative, thought-provoking book with a lot more heart than you'd expect from a novel about time travel.
